

## INFLATION EXPECTATIONS SURVEY TO THE PANEL OF PRIVATE ANALYSTS - EEI -

## **JUNE 2010**

The Inflation Expectations Survey to the Private Panel of Analysts is done monthly in order to obtain the opinion of national and international analysts, knowledgeable of the operational procedures of the monetary policy, in relation to the expected evolution in the prices of the economy. Said survey is extremely useful, given the importance that the inflationary expectations have in the behavior of the general level of prices.

In the first part of this note, we present the results of the survey of inflation expectations and of the economic activity, held between the second and fourth week of June 2010.

In the second part, the trust index of the economic activity is presented, which was made based on the referred survey.

### I. INFLATION EXPECTATIONS AND ECONOMIC ACTIVITY

## 1. INFLATION

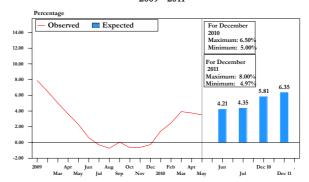

The Economic analysts surveyed foresee an inflationary rhythm of 4.21% for June 2010 with a maximum value of 5.00% and a minimum of 3.60%, while for July 2010; they estimate that it will reach 4.35%. For December 2010, the analysts forecast an average inflation of 5.81%, registering a maximum value of 6.50% and a minimum of 5.00%. For December 2011, they consider that this could reach 6.35% with a maximum value of 8.00% and a minimum of 4.97%.

On the other hand, the economic analysts estimated that for June 2011 the inflation would be at 4.81%, while for June 2012, this could be at 5.45%<sup>1</sup>

\_

<sup>&</sup>lt;sup>1</sup> Within the Monetary, Foreign Exchange Rate, and Credit Policy for 2010, approved by the Monetary Authority, it was established that for informative reasons they would also report the inflation expectations referred to on a 24-month mobile horizon.

#### INFLATION OBSERVED AND EXPECTED 2009 - 2011

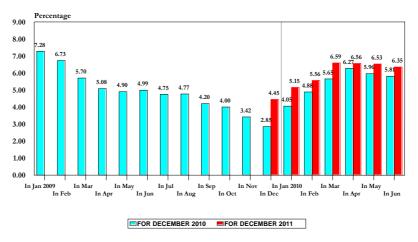

Source: Banco de Guatemala and Inflation Expectations Survey from the Panel of Private Analysts

When comparing the results of this survey with the obtained the month before, it was observed that the expected inflationary rhythm for June 2010 decreased by 0.06 percentage points (4.27% from the survey in May 2010); while for July 2010, it decreased by 0.11 percentage points (4.46% in the previous survey).

For the end of 2010, the expected inflationary rhythm decreased 0.15 percentage points (5.96%, in the previous survey), whereas for December 2011 it decreased 0.18 percentage points (6.53% in the previous survey).

## INFLATION EXPECTATIONS FOR DECEMBER 2010 AND FOR DECEMBER 2011

SOURCE: Inflation Expectations Sruvey from the Panel of Private Analysts.

In the opinion of the interviewed analysts, the main factors that could explain the forecast of inflation for 2010 are the international price of oil, the prices of fuel, the climate conditions, the performance of the fiscal policy, the price of raw materials and the performance of the monetary policy.

### FACTORS THAT COULD EXPLAIN THE FORECASTOF INFLATION FOR DECEMBER 2010

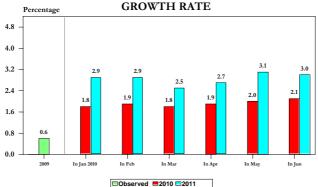

#### -In percentage-

FACTORS	In January	In February	In March	In April	In May	In June
International price of oil	16.67	19.05	18.18	21.13	20.34	18.97
Price of fuels	16.67	14.29	15.91	18.30	18.64	17.24
Climate conditions	6.25	7.14	6.82	4.23	5.09	15.52
Performance of the fiscal policy	10.42	11.91	15.91	15.49	18.64	13.79
Price of Raw Material	14.58	9.52	6.82	12.68	10.17	10.35
Performance of the monetary policy	8.33	11.91	9.09	11.27	8.48	10.35
Seasonality of agricultural products	8.33	4.75	9.09	5.63	6.78	8.62
Nominal exchange rate	12.50	11.91	9.09	7.04	8.48	3.45
Others	6.25	9.52	9.09	4.23	3.38	1.71
TOTAL	100.00	100.00	100.00	100.00	100.00	100.00

## 2. ECONOMIC ACTIVITY

In June 2010, the private analysts estimated that for said year the economic activity, measured by the Real Gross Domestic Product, will register growth of 2.1%, number higher by 0.1 percentage points to the forecasted by the economic analysts in the previous survey (2.0%). For 2011, the analysts estimate that it will be at 3.0%, number lower by 0.1 percentage points to the forecast the previous survey (3.1%).

## GROWTH OF THE REAL GROSS DOMESTIC PRODUCT OBSERVED IN 2009 AND EXPECTATIONS FOR 2010 AND 2011

SOURCE: Banco de Guatemala and Inflation Expectations Survey from the Panel of Private Analysts.

According to the analysts interviewed, the main factors that could influence the growth rhythm of the economic activity in 2010 are the execution of megaprojects, the international prices of oil, the price of fuels, the level of interest rates (domestic and foreign) and, the performance of the fiscal policy.

#### FACTORS THAT COULD PROMOTE THE RHYTHM OF THE ECONOMIC ACTIVITY IN 2010

#### -In percentage-

FACTORS	January	February	March	April	May	June
Execution of megaprojects	7.89	12.20	12.19	15.56	15.00	14.63
International price of oil	5.26	9.76	14.63	11.11	15.00	12.20
Price of fuels	7.89	9.76	12.19	8.89	15.00	12.20
Levels of the interest rate (domestic and foreign)	13.17	9.76	9.76	11.11	7.50	12.20
Performance of the fiscal policy	7.89	12.20	17.07	13.33	5.00	12.20
Stability in the nominal exchange rate	10.53	9.76	9.76	6.67	7.50	9.75
Stability in the general level of prices	7.89	7.30	2.44	6.67	7.50	7.31
Strengthening of the domestic market	13.17	12.20	9.76	11.11	10.00	4.88
FTA with the United States of America	5.26	4.86	2.44	4.44	7.50	2.43
Others	21.05	12.20	9.76	11.11	10.00	12.20
TOTAL	100.00	100.00	100.00	100.00	100.00	100.00

## II. TRUST INDEX OF THE ECONOMIC ACTIVITY FROM THE PANEL OF PRIVATE ANALYSTS

The Trust Index of the Economic Activity from the Panel of Private Analysts has the purpose of measuring the perception on the current economic situation and the environment for business that the interviewed economic analysts have, which is compared with the prevailing index in the recent past. Also, pursues obtaining an appreciation on the economic evolution of the country in the near future. For that purpose, the private analysts were asked a series of questions, which results are as follows:

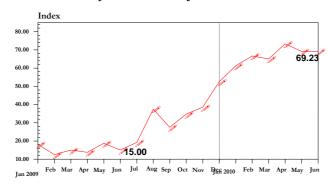

INDICATORS OF THE TRUST LEVEL

OVEROWONE		2009								2010

In June 2010, the trust index level of the economic activity<sup>2</sup> was at 69.23, index higher by 0.09%, regarding the registered the month before (69.17) and higher by 361.53% regarding the observed in June 2009 (15.00).

 $<sup>^2</sup>$  The index is made based on four questions. Their calculation is derived from considering sub-indexes for each question; same that result from the balance of answers that are obtained subtracting, for each question, the percentage of positive answers, the percentage of negatives and add a constant of 100, with the purpose of avoiding negative quantities. The sub-indexes obtained this way for each question are averaged and the trust index results from expressing said average value as a percentage of the maximum possible average.
