

INFLATION EXPECTATIONS SURVEY TO THE PANEL OF PRIVATE ANALYSTS - EEI -

JANUARY 2009

The Inflation Expectations Survey to the Private Panel of Analysts is done monthly in order to obtain the opinion of national and international analysts, knowledgeable of the operational procedures of the monetary policy, in relation to the expected evolution in the prices of the economy. Said survey is extremely useful, given the importance that the inflationary expectations have in the behavior of the general level of prices.

In the first part of this note we present the results of the survey of inflation expectations and of the economic activity, made between the second and fourth week of January, 2009.

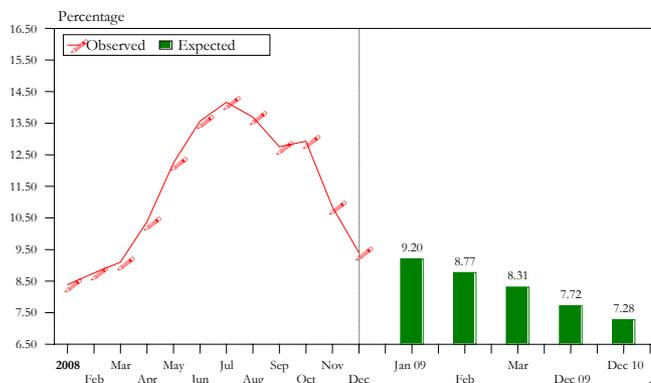

In the second part, the trust index of the economic activity is presented, which was made based on the referred survey.

In January, 2008, the trust index level of the economic activity¹ was at 18.18, index higher by 8.14%, regarding the registered the month before (19.79) and lower by 55.25% regarding the observed in January the previous year (40.63).

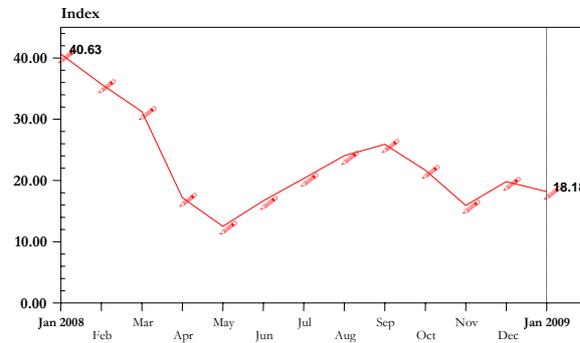

¹ The index is made based on four questions. Their calculation is derived from considering sub-indexes for each question; same that result from the balance of answers that are obtained subtracting, for each question, the percentage of positive answers, the percentage of negatives and add a constant of 100, with the purpose of avoiding negative quantities. The sub-indexes obtained this way for each question are averaged and the trust index results from expressing said average value as a percentage of the maximum possible average.
